

We believe it's possible to open up unlimited resources of power and minerals throughout the world if our technology is applied in the future

DEEP GEOTHERMAL ENERGY

RETHINK OUR ENERGY FUTURE

there are no fundamental limitations for construction of deep shaft
and underground galleries if block excavation
and electric pulse boring are applied

Meet us at World EXPO 2020 DUBAI
during January 2022

EXPO
2020
DUBAI
UAE

OFFICIAL PARTICIPANT – SLOVAKIA

SLOVAK
PAVILION

www.vunar.eu

it is estimated that just in 3 to 5 kilometers into Earth's crust there is enough heat preserved to cover human energy consumption for at least ANOTHER 100.000 years

we are the **world leading** companies
that **develop technologies** to exploit energy in such depths

the **DEEPER** we go,
the more **ENERGY** we get

we turn
global energy potential of earth crust
into reality

CLEAN
RENEWABLE
ACCESSIBLE

ANYWHERE

we bring
carbon free future
FOR ALL

SAVE THE PLANET **TODAY**
FOR THE GENERATION **OF TOMORROW**
